25 CENT GASOLINE

Remember when gas was only 25-cents a gallon? You could buy four gallons for a buck! At that time our dollar was backed by silver. Guess what? That same amount of silver still buys four gallons of gas today! That proves that real money like gold and silver holds its value and the US dollar is now worth a lot less. As a matter of fact, when you think about it, gas, food, and almost everything else has NOT gotten more expensive. It only seems that way because the value of the US dollar is worth less and less and so it takes more and more of it to buy the same goods and services. Most people think prices have gone up, but in reality, it is the value of the US dollar that has actually gone down.

MONEY STORY IN PICTURES

Look at these graphs. As the National Debt has risen, the Purchasing Power of the US dollar has fallen. In fact since 1913 when the Federal Reserve was created by Congress, the government reports that up to 2001 the US dollar lost 96% of its purchasing power!

DEBT AND INFLATION

The Federal Reserve creates inflation when it issues US dollars backed by government debt. From 1913, when the Federal Reserve was created by Congress to 2001, the national debt grew to \$6 trillion. In the next three years it climbed sharply by another trillion dollars in 2004. In the following four years, approximately a trillion per year was added and the national debt is now almost \$11 trillion! The government now projects to add TWO trillion dollars to the national debt in 2009! This alarming acceleration of the national debt means you are rapidly losing your purchasing power. Fortunately there is a simple and profitable solution to the mounting inflation - good old-fashioned money - Gold and Silver Liberty Dollars. Call 888.LIB.DOLLAR to order.
