I am very concerned about what is happening to our money and our future. Why? I was the Mintmaster at the Royal Hawaiian Mint for 25 years and have devoted my life work to the study of money, why it is valuable, and how we use it to fulfill our dreams. Like you, I am paying a lot higher gas prices, but I am also saving a lot of money because of a simple change I have made to my money.

While I was the Mintmaster in Hawaii I harbored a secret project. For over 23 years I worked on developing a value backed paper currency to complement the Mint's commemorative coin business. Not satisfied with just copying the paper money from the Kingdom of Hawaii of the 1800's, I wanted to create a totally new free market currency that met the demands of the current free market in precious metals and would represent real gold and silver stored in an independent warehouse. I called my secret project the "Hawaiian Sovereign Currency". Oh, it was beautiful with the Statue of Kamehameha and all the flora of Hawaii. Then one night, while I was working at the Waikiki Branch Mint, an elderly gentleman stopped by. He turned out to be one of our collectors and a paper money collector to boot. So I decided to share my secret with him and use him as a focus group of one. Oh, he loved the Hawaiian currency idea. So I shared a bit more of my plan. He was enthused and asked for more details. Well over a two-hour period, I shared the whole plan with my new-found friend.

He loved my idea so much that he wanted to order some of the new currency immediately, even though I told him that it had not been produced yet. Then he stopped and appeared to fall into a deep thought and out of the blue he asked me if I knew about the Federal Reserve and that the US dollar is not backed by anything but debt!? Well, I confirmed that I had studied all the monetary systems and that, yes, it was just a matter of time before the US dollar would fail as every other "fiat" system had. The old man was noticeably pleased to hear that and immediately suggested that I take my new free market currency to the mainland! He said our country needed it; that hard times were coming and the people need a way to protect their money. Leave Hawaii!? What heresy I thought! But with the

children gone to college on the mainland and my 25th anniversary approaching, I decided to retire and follow my new friend's advice.

Quickly I replaced Statue of Kamehameha with the Statue of Liberty and the Hawaiian palm fronds with the geometric artwork that most paper money is known for and the Liberty Dollar was born on October 1, 1998. Of course all the disciplines of the gold and silver currency - the interlocking check and balances, audits, and ultra high security devices that I had designed into the original currency system - remained the same.

Now seven years later, I have created a website to show you how you can take control of your money and the value thereof, back into your own hands and stop being ripped off by the FED and others. Now you can stop being a victim of the monetary powers and control your own monetary future. I am here to tell you that we can save our country from a monetary crisis! Yes it is a big job, and that is why I need your help because it depends on you. The best part about all this is that we already have a proven and profitable model, plus you can make money, do good and have a lot of fun while at the same time protecting the value of your hard earned wealth, the future of our country and more! Did you know that you can truly profit from doing what's right?

I am! America is and yes, you can too!

The Liberty Dollar was created to give Americans a choice and a better currency. Since 1913, die American people have endured a rising national debt and the loss of purchasing power from die monopolistic issue of die money by the Federal Reserve. This monopoly has caused the dollar to sink in value, created the Great Depression, vicious business cycle that causes jobs to be lost, asset price bubbles, and is on the verge of causing even more damage including debt catastrophe and even economic collapse.

We created the Liberty Dollar because we don't want to see die whole world financial system collapse (who does?) We'd rather give people a peaceful, free-market solution to protect themselves from the looming monetary meltdown. Now you have a choice. We hope you will chose to protect your purchasing power and do what is right for our great country and the world. The Liberty Dollar allows you to earn profits in many ways. Time alone shows how Gold and Silver backed currency is indeed inflation proof.

Now, which do you choose?; the Federal debt-taxation-military- inflation evaporating money or the peaceful-free-market-voluntary-sound- gold and silver backed money? It is, after all, your choice.

What do the Authorities think?

Well, the Federal Reserve, U.S. Treasury's Bureau of Engraving and Printing, and the Secret Service have all seen and reviewed the Liberty Dollar. The

Federal Reserve has said **"So be it"**; U.S. Treasury BEP **"Legitimate"**, U.S. Secret Service **"Not counterfeit"**.

The press says:

"Could give U.S. greenbacks a run for their money" -Huntington Beach Independent.

"A concept almost anyone can get behind" Utne Reader,

"As good as silver" Austin American-Statesman.

Users say:

"This is a blast - the word's getting out"- B. Ibarra, Austin TX;

"Given time, it'll be as common as credit cards"- T.J., Calabassas CA;

"I simply hand them the currency as payment. 95% of the businesses accept it"- C. Athanas, Austin TX;

"It's fun, and very simple" L. Farrenkopf, Victor MT;

"I now pay for my lunch in real money" V. Callaway, Tahoma WA.
